

## Sliding Door Options

Each option can be applied to both a walk-in shower and on a bathtub.

### Traditional Sliding Shower Doors:

- Similar to what can be obtained from Big Box Store.
- 1/4" Glass
- Both panels are operable
  - Allows you to access the controls, turning the water on without getting a blast of cold water in your face.
- Towel bars on one or both panels.
- Metal is around the entire parameter.

### Traditional Sliding Shower Doors:

- Similar to what can be obtained from Big Box Store.
- 1/4" Glass
- Both panels are operable
  - Allows you to access the controls, turning the water on without getting a blast of cold water in your face.
- Knobs on each panel
  - Creates an extremely customized look. You can not get a shower like this from the box store.
- Metal is around the entire parameter.

### **Barn Door Sliding Shower Doors:**

- 3/8" Glass
- One panel is operable
  - Accessing the controls, and turning the water on without getting a blast of cold water in your face, might be a challenge
- Knob
  - While you can add a towel bar, see the section on "Towel Bar's" later in this document.
- You can not get an application like this in the box store.
  - Notice there is not any vertical metal on either side of the panels and no horizontal metal at the bottom.
  - Out Senior Templaters, laser template the space and have the glass fabricated to the contour of the surface, eliminating the need for a channel.

### **Barn Door Sliding Shower Doors:**

- 3/8" Glass
- Both panels are operable
  - Allows you to access the controls, turning the water on without getting a blast of cold water in your face.
- Knob
  - While you can add a towel bar, see the section on "Towel Bar's" later in this document.
- You can not get an application like this in the box store.
  - Notice there is not any vertical metal on either side of the panels and no horizontal metal at the bottom.
  - Out Senior Templaters, laser template the space and have the glass fabricated to the contour of the surface, eliminating the need for a channel.

### Barn Door Sliding Shower Doors:

- 3/8" Glass
- Glass Header
- Both panels are operable
  - Allows you to access the controls, turning the water on without getting a blast of cold water in your face.
- Knob
  - While you can add a towel bar, see the section on "Towel Bar's" later in this document.
- You can not get an application like this in the box store.
  - Notice there is not any vertical metal on either side of the panels and no horizontal metal at the bottom.
  - Out Senior Templaters, laser template the space and have the glass fabricated to the contour of the surface, eliminating the need for a channel.

### Barn Doors With Grids

**Towel Bars:** While it is extremely common to have towel bars on the glass panels, consider the following

- Might a towel distract from the beautiful tile selected?
- Might the towel be adjacent to a commode?
  - Some boys' ability to aim can be problematic

### **Warranty: (As it relates to sliding shower glass doors)**

- AG offers a 3-year warranty, providing longer-term coverage.
  - Most issues occur within the two significant seasonal changes from fall to winter and spring to summer when the home settles the most.
- **Why?** We stand by the quality of our products and installation.

### **Rollers:**

- Rollers can fail due to the weight of the door; we use high-quality rollers that prevent failure.
- **Consequence:** If the rollers fail, the glass can slide out, leading to the glass exploding.

### **Doors Ghosting:**

- **Ghosting** means the doors will slide open during use, which can be frustrating.
- This happens as the house settles, particularly during seasonal changes from spring to summer and fall to winter.
- ***Many things in your house settle during seasonal changes.***

### **Leaking Issues:**

- Without professional installation, doors may leak.
- AG uses laser templates, considering every " to ensure a precise fit.

### **Professional Installation:**

- **Installation Quality:** AG's installation crew are masters of their craft, ensuring top-tier installation and results.
